Descriptions

SS116 series flush mount pressure transducer is rugged silicon technology based and all-welded flush mounted designed that facilitates accurate measurements of corrosive or higher viscosity media, the transducer offers great flexibility and reliability for a wide range of applications in many industries such as water, food, beverage and pharmaceutical where non-flush port transducer is otherwise prone to clogging or damage with competitive price.

The transducer offers excellent long term performance throughout the complete range of pressures from 0-0.35 to 0-600 bar, pressure is coupled from a SS 316 membrane that deforms with pressure via a transmission fluid (silicone oil), wetted materials are SS #316, compatible to almost all industrial fluids and gases, it can be customized to g 1/2 inch, g 3/4 inch, g 1 inch and other male thread interfaces upon request.
